

Kevin N. Hainline

CONTACT INFORMATION	Steward Observatory University of Arizona Room 256 933 North Cherry Avenue Tucson, AZ 85721 <i>Email:</i> kevinhainline@arizona.edu <i>Website:</i> kevinhainline.github.io
CURRENT POSITION	Associate Research Professor, James Webb Space Telescope NIRCam Science Team, JWST Advanced Deep Extragalactic Survey Team
RESEARCH INTERESTS	Galaxy Evolution, Active Galactic Nuclei, High-Redshift Galaxies, Infrared Astronomy, Science and Astronomy Education, Planetarium Education
EDUCATION	University of California, Los Angeles, Los Angeles, CA USA Ph.D., Astronomy, September 2006 - July 2012 • PhD Thesis Title: <i>Understanding Star Formation and AGN Activity at $z \sim 2-3$</i> • Advisor: Professor Alice E. Shapley M.S., Astronomy, May 2008 • Master's Thesis Title: <i>Mid-Infrared Line Diagnostics Of Seyfert Galaxies from the 12 μm Sample</i> • Advisor: Professor Matt A. Malkan Harvey Mudd College, Claremont, CA, USA B.S., Physics, June 2006 • With High Honors in Humanities • Astronomy specialization (emphasis on observational astronomy)
EMPLOYMENT	Steward Observatory, University of Arizona, Tucson, AZ, USA Career-Track Associate Research Professor, 07/2024 - Present Career-Track Assistant Research Professor, 03/2020 - 07/2024 Senior Research Associate, 11/2017 - 03/2020 Postdoctoral Research Associate, 09/2015 - 11/2017 Department of Physics & Astronomy, Dartmouth College, Hanover, NH, USA Postdoctoral Researcher 05/2012 - 09/2015
TEACHING	University of Arizona, Tucson, AZ <i>Pima Community College</i> Fall 2025 • I am teaching a 16-week undergraduate class on the Solar System, with both a lecture and lab component. • https://www.pima.edu/

Osher Lifelong Learning Institute (OLLI)

Fall 2018 - Present

- Speaking with senior (50+) learners about astronomy, including creating a semester class on the history of space exploration and discovery in the Spring of 2020.
- <https://olli.arizona.edu/>

Dartmouth College

The Solar System

Summer 2015

- I designed and taught an astronomy course for sophomores about the Solar System, including the lectures, classroom activities, homework, and tests. The materials for this course were used well after I left Dartmouth.

GRADUATE AND
UNDERGRADUATE
RESEARCH
MENTORING

University of Arizona, Tucson, AZ

Jakob Helton

Spring 2022 - Summer 2025

- Graduate student Jakob Helton started working with me on photometric redshift estimation during his first year at the University of Arizona. He's been an integral member of the JADES team, and has served as a first author on multiple papers studying galaxy overdensities in the early universe, while also assisting in crucial ways in other works from JADES members. He defended his PhD successfully and started a postdoctoral fellowship at Penn State in late summer 2025.

Sophie Lebowitz

Fall 2020 - Present

- I co-mentor graduate student Sophie Lebowitz along with Dr. Stephanie Juneau at NOIRLab. She works on exploring images of AGN resolved narrow-line regions with JWST NIRCам. She aims to defend her PhD in the summer of 2026.

Raphael Hviding

Fall 2018 - Spring 2023

- I mentored Raphael during his entire time at the University of Arizona, and helped with his growth as a scientist and a science communicator. Raphael Hviding successfully defended his thesis "Seeing Red: The Present and Future of Mid-IR AGN Selection with Optical Spectroscopy" in the spring of 2023, before moving on to the Max Planck Institute in Heidelberg as a postdoctoral researcher.

Tristen Shields

Summer 2023 - Present

- Tristen is a University of Arizona undergraduate who works on exploring JADES low-surface-brightness galaxies for his undergraduate thesis.

Jessica Aguayo

Summer 2025

- Jessica worked with me and Sophie as a University of Arizona summer undergraduate research fellow on a project fitting AGN spectra at $z = 2 - 3$. She has presented her work at the McNair Undergraduate Research Conference in Albuquerque, New Mexico in September of 2025.

Jacob Magnussen

Summer 2021

- Jacob was a NASA Space Grant intern and undergraduate who, in the run-up to the launch of JWST, worked with me and Dr. Eiichi Egami at the University of Arizona to explore simulating NIRCам images of distant galaxies with the software *Phosim*.

TELESCOPE
PROPOSALS

JWST

Spring 2025

- I am the co-PI of the team behind successful JWST Cycle 4 GO proposal ID 5997 “Forever Blowing Bubbles: What Powers a 24-kpc Ionized Gas Nebula Around a Normal Galaxy at $z = 6$?”

Spring 2025

- I am the key member of the team behind successful JWST Cycle 4 GO proposal ID 8544 “Rest-Frame Optical Nebular Emission Lines at Cosmic Dawn: MIRI/LRS Follow-Up for JADES-GS-z14-0”

Fall 2024

- I am the American co-Investigator of the team behind successful JWST Cycle 3 GO proposal ID 5997 “OASIS: Observing All phases of Stochastic Star formation - A census of galaxies at $z = 5-8$ over the entire SFR - M^* plane.”

Fall 2023

- I am a key member of the team behind successful JWST Cycle 2 GO proposal ID 3215 “Unveiling the Redshift Frontier with JWST.”

MMT Hectospec/Binospec/MMIRS **Fall 2020, Spring 2021, Fall/Spring 2022**

- Alongside UA graduate student Raphael Hviding, I used multiple instruments to observe photometrically-selected AGN candidates that served as a portion of his thesis.

MMT Blue Channel Spectrograph

Fall 2016

- I used the blue channel spectrograph to explore resolved narrow-line regions for a sample of obscured quasars, following-up research done at Dartmouth.

CONTRIBUTED
SOFTWARE

JADESView

Summer 2022

- JADESView is a GUI for exploring high-redshift galaxy fits made with multiple photometric redshift codes, alongside thumbnails for selecting follow-up candidates. It has been successfully used by the JADES team for targeting the NIRSpec Multi-Shutter Array in multiple observational campaigns.
- <https://github.com/kevinhainline/JADESView>

NIRCPPrepareMock

Spring 2019

- NIRCPPrepareMock is a series of python scripts for converting JAGUAR into catalogs with simulated noise for use in preparing JWST proposals and exploring galaxy color spaces and photometric redshifts.
- <https://github.com/kevinhainline/NIRCPPrepareMock>

JAGUAR

Fall 2018

- JAGUAR, The JAdes extraGalactic Ultradeep Artificial Realizations (Williams, KH et al. 2018) is a full suite of mock galaxy realizations designed to help prepare the scientific community for observations with JWST.
- <https://fenrir.as.arizona.edu/jwstmock/>

OUTREACH

University of Arizona, Tucson, AZ

Pima-UA STEM Bridge Program

Fall 2020 - Present

- Mentoring 8 Pima Community College STEM students during and after their transfer to the UA.
- <https://asems.arizona.edu/programs/pima-uaz-stem-bridge-program>

AAS CSMA Micro Grant Application Review

Fall 2021 - Present

- Reviewing American Astronomical Society (AAS) Committee on the Status of Minorities in Astronomy (CSMA) Micro-Grant applications for black, indigenous, people of color and other students suffering the effects of financial scarcity.
- <https://aas.org/posts/news/2021/03/aas-csma-launches-micro-grants-program>

Steward Department Climate and Mentoring Task Forces **Present**

Summer 2020 -

- These task forces bring undergraduates, graduate students, postdoctoral researchers, and faculty together to explore issues relating to diversity, equity, and inclusion within Steward Observatory.

Skype A Scientist Program

Spring 2020 - Present

- This service pairs research scientists with global classrooms of students to discuss their work, as well as answer questions and lead discussions.
- <https://www.skypeascientist.com/>

Arizona Science Teachers Association (ASTA)

Fall 2018 - Present

- I have served as an annual speaker at the Arizona Science Teacher Association (ASTA) annual meetings, both in person and virtually, since 2018. I have also, through this connection, spoken with many school groups across Arizona about astronomy.
- <https://azsta.org/>

Referee Service

- *Astrophysical Journal*
- *Monthly Notices of the Royal Astronomical Society*
- *Astronomy & Astrophysics*
- *Publications of the Astronomical Society of the Pacific*

Telescope Time Allocation Committees

- *Chandra X-Ray Observatory*
- *NuSTAR X-Ray Observatory*
- *NASA Research Opportunities in Space and Earth Sciences (ROSES) Program*

Dartmouth College

Montshire Museum of Science

Fall 2013 - Summer 20115

- I worked as a weekly volunteer at the Montshire Museum of Science, designing and leading educational programs for guests of all ages and working directly with the museum to guide the guest experience.
- <https://www.montshire.org/>

OTHER

SCHOLARSHIP

STEM to Story: Enthralling and Effective Lesson Plans for Grades 5-8

2015

- I created and contributed a science writing workshop "The Science of Saving Daylight" to a book of lesson plans for teaching science through creative writing activities, published in 2015.

Below, I list a current bibliography, separated into two sections, each organized by year. In the first section are my own first author papers. In the second section are the remainder of the publications for which I am a co-author. I have 16 first author papers, and I am a co-author on 98 additional papers. My h-index for my first author publications is 13, with two papers having over 150 citations each. For all of my publications, my h-index is 55. The majority of my papers have come in the last four years since the launch of JWST, during which I played a key role as a member of the JADES collaboration, which is reflected by my position within the author lists of JADES publications.

FIRST-AUTHOR PUBLICATIONS

1. **Hainline, K.N.**, Maiolino, R., Juodžbalis, I., Scholtz, J., Übler, H., D'Eugenio, F., An Investigation into the Selection and Colors of Little Red Dots and Active Galactic Nuclei. *ApJ*, 979(2), 138 (2025). doi:10.3847/1538-4357/ad9920
2. **Hainline, K.N.**, D'Eugenio, F., Jakobsen, P., Chevallard, J., Carniani, S., Witstok, J., Searching for Emission Lines at $z > 11$: The Role of Damped Ly α and Hints About the Escape of Ionizing Photons. *ApJ*, 976(2), 160 (2024). doi:10.3847/1538-4357/ad8447
3. **Hainline, K.N.**, D'Eugenio, F., Sun, F., Helton, J.M., Miles, B.E., Marley, M.S., JADES: Spectroscopic Confirmation and Proper Motion for a T-Dwarf at 2 kpc. *ApJ*, 975(1), 31 (2024). doi:10.3847/1538-4357/ad76a7
4. **Hainline, K.N.**, Johnson, B.D., Robertson, B., Tacchella, S., Helton, J.M., Sun, F., The Cosmos in Its Infancy: JADES Galaxy Candidates at $z > 8$ in GOODS-S and GOODS-N. *ApJ*, 964(1), 71 (2024). doi:10.3847/1538-4357/ad1ee4
